

# **Assignment no. 7**

- **Name** : Kunal Dhanaji Khairnar
- **College** : G.P.Pune
- **Class** : First-Year (H1)
- **Sub** : Web Designing

**Enroll. No.** : 2106099

② Aim : Apply border properties : Create a webpage with paragraph, headers and information of your choice. Apply and practice following effects on webpage.

- Set all top border properties of para.
- Set style on bottom border for para
- Set the width of left border.
- Assign different colours for border. use hexadecimal colour assignment
- Set border for some paragraph.
- Apply border to page.
- Set border with the width to header.

③ Theory : Input program :

```
<html>
<head>
    <title> Assignment 7 </title>
</style>
    head {
        background-color : rgb(216,255,6);
        border : 8px ridge rgb(255,8,210);
    }
    body {
        border : 8px ridge rgb(255,0,0);
    }
    .one {
        border : 8px inset rgb(255,0,0);
    }
```

# Top 5 cryptocurrencies

## 1.Bitcoin (BTC)

Created in 2009 by someone under the pseudonym Satoshi Nakamoto, Bitcoin (BTC) is the original cryptocurrency. As with most cryptocurrencies, BTC runs on a blockchain, or a ledger logging transactions distributed across a network of thousands of computers. Because additions to the distributed ledgers must be verified by solving a cryptographic puzzle, a process called proof of work, Bitcoin is kept secure and safe from fraudsters.

## 2. Ethereum (ETH)

## 2. Ethereum (ETH)

The first Bitcoin alternative on our list, Ethereum (ETH), is a decentralized software platform that enables smart contracts and decentralized applications (dApps) to be built and run without any downtime, fraud, control, or interference from a third party. The goal behind Ethereum is to create a decentralized suite of financial products that anyone in the world can freely access, regardless of nationality, ethnicity, or faith.<sup>4</sup> This aspect makes the implications for those in some countries more compelling, as those without state infrastructure and state identifications can get access to bank accounts, loans, insurance, or a variety of other financial products.

## 3. Litecoin (LTC)

*Litecoin (LTC), launched in 2011, was among the first cryptocurrencies to follow in the footsteps of Bitcoin and has often been referred to as "silver to Bitcoin's gold."<sup>11</sup> It was created by Charlie Lee, an MIT graduate and a former Google engineer.*
